TOPSHELL: THE CEMENT MICROSURFACE

TopShell is a cementitious overlay product designed to reface and extend the life of asphalt and concrete pavements. TopShell bonds permanently to exposed aggregates, asphalt, and concrete providing a permanent wearing surface or "Topshell". The resulting surface can have a 15+ year lifespan.

TopShell can be used to help municipalities, HOA's and private business owners bridge the gap between continually paying for petroleum-based preventative maintenance products and the expensive process of milling/overlaying the existing asphalt. TopShell can be manufactured in a variety of colors.

TOPSHELL BENEFITS:

- Provides a long-term wearing surface to existing pavements
- Can Result in a 15+ Year Lifespan
- Increases Friction and Skid Resistance
- Manufactured in a Variety of Colors
- Can reduce surface temperatures up to 40°F
- Environmentally Friendly
